Some Tips And Tricks For Getting More Results From Yahoo! Answers

Yahoo! Answers can be a great place to get instant traffic and sales from hungry, targeted buyers. But what you didn't know is that there are a few tips and tricks you can do in order to get the most out of your Yahoo! Answers marketing ventures.

First of all, it is incredibly useful to create between 2-3 accounts that you will use regularly. You will want to create at least 2 accounts , or better yet, 3 accounts so that way you can cross-reference. But why would you want to cross-reference? For many reasons!

Cross-referencing can help gain you tons of points instantly, boosting your points score and even improving your "level" quickly. The higher up you are on levels, the more respected you are. Not only that, the more "best answers" you get, the better exposure you get also!

What many don't know is that you can actually vote for your very own answer as the "best answer"!! Be sure to check back on your answers for when they are voting for a best answer and vote for your own as the best answer. Another thing I need to mention though is, please make informed and valuable answers. Do NOT spam Yahoo! Answers. The world could use less spam, both in our inboxes and elsewhere!

Now here comes the technique that many Internet Markets have no idea about on how to dramatically boost your "best answers".

Simply log into your "other" accounts and vote for your answer as the "best answer" and there you have it! With three accounts, there is a 90% chance your answer will always be chosen as the "best answer"! This method involves a lot of cross-referencing, but it is so worth it in the long run.
