The Best Online Marketing Business - Review Of My Affiliate Power Site

[Note: This is a review, click here if you want to visit My Affiliate Power Site](#)

The reason I signed up with and started working with My Affiliate Power Site (MAPS) is that I wanted an all in one solution to Internet marketing including a website, newsletter, autoresponder, web hosting, training and things like that. I was involved with the Plug In Profit Site prior to this but their program had a lot of problems and they kept changing the core programs so frequently that my head was spinning. MAPS combines the Internet's 6 best affiliate programs into one package. The beauty of this system is that when you do your web promotions, you are actually promoting 6 programs instead of just one. The net result is a huge amount of marketing leverage.

Below are several benefits associated with belonging to MAPS:

1. You are provided with a "ready to go" affiliate website for free. This site can be easily changed to suit your own needs, any time you want.
2. Your website will be powered by Wordpress which is essentially the easiest platform to work with nowadays. Also, Google loves Wordpress, so this will immediately give you a competitive edge.
3. There is extensive training available to help you market and promote your new website.
4. The customer support is superb and all requests for help are answered promptly.
5. Five of the best Internet marketing experts are available as part of the MAPS team. These experts will become your core mentoring team.
6. **Your website comes complete with a newsletter sign up box as well as a pre-populated newsletter which will be sent to your clients automatically. Who really wants to bother creating their own newsletter? – I wouldn't even know how.**

What I don't like about My Affiliate Power Site:

1. When you view your down line stats within your member's area, it only shows the number of your sign ups but not their names. If you want to have a record of the names, then you need to save each sign up email that you receive in a separate folder (which is how I do it). This is not really a big deal, just a minor annoyance.

Overall, I think that My Affiliate Power Site is the best, all inclusive, Internet marketing business system available online today.
